## Elmdale PS – Construction Update #01

Construction has begun! Expect to see the following activity on the property in the next few months:

### **October:**

- Interior demolition and abatement within the original building
- Library demolition to be completed by the end of the month which means large equipment on site within the next week

### **November:**

- Excavation and removal of contaminated soils
- New interior work to begin in the existing building

### **December:**

- Foundation work for the addition and new elevator
- Interior work continues within the existing building

### **Schedule:**

We are working on determining an estimated completion date for the project and based on preliminary schedule information, we are optimistic that we may be complete by December 1, 2020. However, due to the complexity of increased construction activity while exposed to winter conditions, this date will be monitored closely and cannot be fully determined until we are further into construction.

The schedule will be adjusted and completion date revised as we move further into construction and information becomes available.

We will review progress on a monthly basis and provide construction updates within a similar time period.

Construction based comments/questions can be sent to [facilities@ocdsb.ca](mailto:facilities@ocdsb.ca)
